On January 31, 2017, P.V. Nano Cell Ltd. (the “Issuer”) issued a press release announcing that the U.S. Patent and Trademark Office has granted its silver nano particles patent. A copy of the press release is attached hereto as Exhibit 99.1 and is incorporated herein by reference.

**Exhibit Index**

<b>Exhibit No.</b>	<b>Description</b>
99.1	Press Release, dated January 31, 2017

**SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

**P.V. Nano Cell Ltd.**

## PV Nano Cell Announces U.S. Patent Granted Related to Sicrys™ Silver Inks

**MIGDAL HA'EMEK, ISRAEL** (January 31, 2017) – PV Nano Cell (OTCQB: PVNMF), an innovative producer of single-crystal, metal nanometric based conductive digital inks, announced today that the U.S. Patent and Trademark Office has granted its silver nano particles patent<sup>1</sup>.

“Receiving the U.S. Patent and Trademark Office’s grant of our patent related to Sicrys™ silver inks in the U.S. provides us certain protections as we move ahead with our plans to initiate sales in 2017 to our customers and partners in this market. Our patents for single crystal Nano metal particles based dispersions and inks are key to protecting the technology that allows us to deliver on our vision of revolutionizing the printed electronics industry. At this time, we have been granted patents in three countries for our silver single crystal nano particles based dispersions and inks and have submitted patents related to our silver and copper nano particles in 10 additional countries,” said Dr. Fernando de la Vega, CEO of PV Nano Cell.

PV Nano Cell’s Silver Nano particles patent titled “STABLE DISPERSIONS OF MONOCRYSTALLINE NANOMETRIC SILVER PARTICLES,” covers a concentrated dispersion of nanometric silver particles, plurality of nanometric silver particles, in which a majority are single-crystal silver particles, the plurality of nanometric silver particles having an average secondary particle size (d50) within a range of 30 to 300 nanometers, the particles dispersed within the solvent; and a method of producing the dispersion.

The Company has previously been granted patents for its silver nano particles in Russia (RU 2593311) and China (CN 103282969).

### Silver and Copper Nano Particle Patent Applications

PV Nano Cell has submitted patent applications for both their silver and copper nano particles<sup>2</sup> in the following countries:

- Brazil (112013013885.5 & 11 2016020056 0)
- China (2015800145501)
- Europe (11846848.7 & 15758302.2)
- India (5064/CHENP/2013 & 201647031956)
- Israel (226665 & 247528)
- Japan (100114775 & 2016-554873)
- Russia (2016137018)
- South Korea (10-2013-7015635 & 10-2016-7026792)
- UK (1020556.5 & 1403731.1)
- USA (15/122,185)

### **About PV Nano Cell**

PV Nano Cell has developed innovative conductive inks for use in solar photovoltaics (PV) and printed electronics (PE) applications. PV Nano Cell’s Sicrys™ ink family is a single-crystal, nanometric silver conductive ink delivering enhanced performance. Sicrys™ is also available in copper-based form, delivering all of the product’s properties and advantages with improved cost efficiency. Sicrys™ silver conductive inks are used all over the world in a range of inkjet printing applications, including photovoltaics, printed circuit boards, antennas, sensors, touchscreens and other applications. For more information, please visit PVNanoCell.com.

### **Forward-looking Statements**

This press release contains forward-looking statements. The words or phrases "would be," "will allow," "intends to," "will likely result," "are expected to," "will continue," "is anticipated," "estimate," "project," or similar expressions are intended to identify "forward-looking statements." All information set forth in this news release, except historical and factual information, represents forward-looking statements. This includes all statements about the Company's plans, beliefs, estimates and expectations. These statements are based on current estimates and projections, which involve certain risks and uncertainties that could cause actual results to differ materially from those in the forward-looking statements. These risks and uncertainties include issues related to: rapidly changing technology and evolving standards in the industries in which the Company operates; the ability to obtain sufficient funding to continue operations, maintain adequate cash flow, profitably exploit new business, and sign new agreements. For a more detailed description of the risks and uncertainties affecting PV Nano Cell, reference is made to the Company’s latest Annual Report on Form 20-F which is on file with the Securities and Exchange Commission (SEC) and the other risk factors discussed from time to time by the Company in reports filed with, or furnished to, the SEC. Except as otherwise required by law, the Company undertakes no obligation to publicly release any revisions to these forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.
